Medical Treatment

Our school currently has a student who is receiving medical treatment for cancer. She is actively involved in the school community and recovering from treatments and their side effects.

As this student has a compromised immune system (which makes her more vulnerable to disease), it is important that you do not send your child to school if they are unwell. For example, if your child has an infectious disease (such as the measles, chickenpox or flu), they should stay at home until no longer contagious. For more information about how long an illness is contagious, contact your GP or visit the NSW Health website at www.health.nsw.gov.au.

We would also appreciate it if you would notify the school immediately if your child has an infectious disease, This will allow us to notify the sick student’s parents, if necessary. We appreciate your cooperation.
